## **FOR IMMEDIATE RELEASE**

### **NAVY BASE OFFERS GREEN VEHICLE LUNCH AND LEARN**

WASHINGTON, April 20, 2016 – Joint Base Anacostia-Bolling will host a Green Vehicle “Lunch and Learn” April 21 to discuss the future of electric vehicles both on the base and within Naval District Washington.

Hosted by JBAB’s Energy Manager, Tim Min, the forum is open to all DoD ID card holders. Topics include: hybrid electric vehicles, plug-in hybrid electric vehicles, all-electric vehicles, alternative fuels, and the future of green vehicles throughout the Navy.

This event is part of the Great Green Fleet, is a year-long, Department of the Navy initiative that demonstrates the sea service’s efforts to transform its energy use. As one of the Secretary of the Navy’s key energy goals, the purpose of the GGF is to make our Sailors and Marines better warfighters, able to go farther, stay longer and deliver more firepower.

Secretary Mabus chose the name Great Green Fleet to honor President Theodore Roosevelt’s Great White Fleet, which helped usher in America as a global power on the world stage at the beginning of the 20th Century. The GGF will usher in the next era of Dept. of Navy energy innovation.

Media personnel are invited to cover the April 21 event on JBAB. Press call time is 11:30 a.m., April 22; late arrivals will not be accommodated. News media will meet their JBAB Public Affairs escort at the Joint Base Visitors Center, which is located at the South Gate just off I-295 (exit 1).

All media personnel who intend to cover the event must send the following information to michelle.gordon@navy.mil **before 8 a.m. April 21:**

- Correspondent’s full name
- Date of birth
- Media outlet
- Correspondent’s driver’s license number and state (the card, NOT car tag)
