

**THE U.S. NAVY IS SEEKING INFORMATION FOR
A HISTORICAL RADIOLOGICAL ASSESSMENT (HRA) OF
NAVAL BASE VENTURA COUNTY**

The Navy has contracted Aleut World Solutions (AWS) to prepare an HRA for Naval Base Ventura County (NBVC). The HRA process requires AWS to conduct interviews of current and former Navy personnel, civilian employees, and contractors who can provide information regarding current and historical radiological activities (excluding operations associated with the Navy Nuclear Propulsion Program) by NBVC and its predecessors. Face-to-face or telephone interviews can be arranged. Information from the interviews will only be used to supplement historical research and document an accurate and complete history of past radiological activities by NBVC and its predecessors. AWS is currently scheduling interviews through October 2016. If you are a current or former member of the Navy, civilian employee, or contractor and have information about radiological operations conducted by NBVC or its predecessors, please call (844) 455-4232, and tell us when and how to contact you. A member of the HRA team will return your call and schedule an interview, either in person or by phone. You can also provide information by email by sending it to Mr. Don Arsenault at darsenault@aws-jv.com or take a short survey found on the AWS website: www.aws-jv.com.
