

NAVAL SUPPORT ACTIVITY MONTEREY
ENVIRONMENTAL POLICY

Naval Support Activity Monterey and our tenant activities recognize environmental excellence as a principal factor in mission accomplishment. To meet this standard, we have established a goal of protecting and conserving our environment through active stewardship in accordance with Executive Order 13423, Strengthening Federal Environmental, Energy, and Transportation Management. We commit to the prevention of pollution, and compliance with all environmental laws and regulations. This commitment will be accomplished through an aggressive Environmental Management System (EMS) and a process of continual improvement.

In recognition of this responsibility to installation staff, students, contractors, and neighbors, we commit to:

- Conserving natural resources by reducing, reusing, recycling, and purchasing products made from recycled materials;
- Integrating environmental values into planning, decision-making, and business practices;
- Conserving natural resources, including energy and water;
- Continuing to address the installation significant environmental aspects of solid waste management, water conservation, and hazardous material life-cycle management;
- Conducting routine management reviews to assess progress towards our environmental goals and objectives;
- Being environmentally responsible to ensure protection of the environment and public health and safety; and
- Ensuring this policy is communicated to all personnel and contractors in order to define their roles and responsibilities as stewards of the environment.

I am personally committed to fully implementing the above environmental goals with an emphasis on solid waste management, water conservation, and hazardous material life-cycle management. For further information please contact my EMS Program Manager Mr. Todd Wills at (831) 656-2850.

T. C. FALLER
Captain, USN
