

RECP

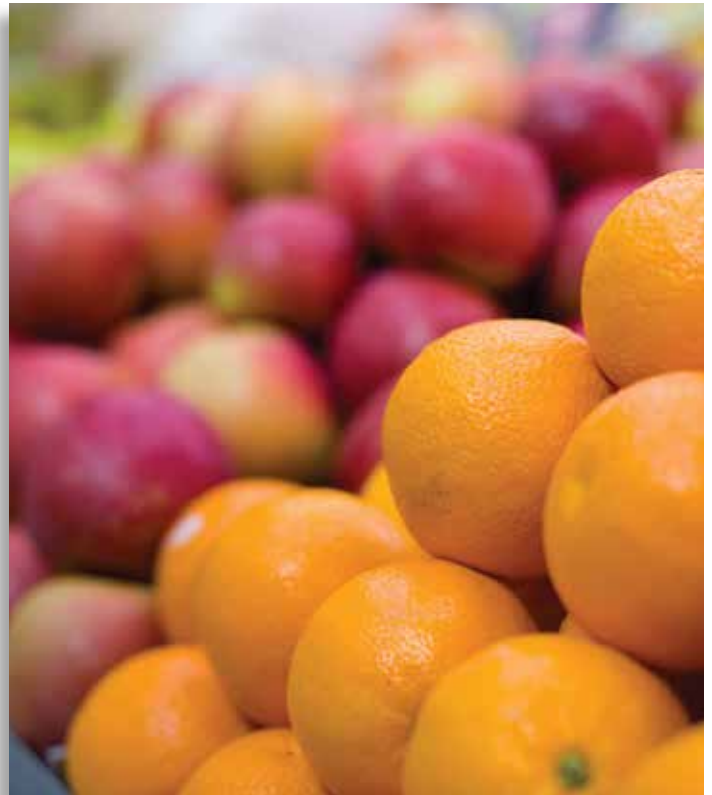

RESIDENT ENERGY CONSERVATION PROGRAM

Like-Type Groups

Like-Type Groups (LTGs) are used to determine the average utility use and create the monthly Normal Usage Band. LTGs are not determined by family size or behavior.

The installation groups privatized homes with similar energy efficiency. Characteristics that may be used to create LTGs are:

- ✓ **Neighborhood**
- ✓ **Age/Condition of Home**
- ✓ **Overall Size of Home (sq ft)**
- ✓ **Number of Bedrooms**
- ✓ **Type of Dwelling**
- ✓ **Type of Energy Used (electricity, gas, etc.)**

To learn more about RECP and LTGs in your neighborhood, contact your privatized housing community manager or your local Housing Service Center.
